

THE **#1 DISRUPTOR** IN ACQUIRING QUALITY IMAGES IS PATIENT MOVEMENT.

Patients are not statues,
they are going to move.

Exclusive to all Planmeca ProMax® 3D Imaging Systems

"I had a patient that came in with Parkinson's Disease, and this disease poses a problem for a CBCT machine due to tremors. With CALM Software (Correction Algorithm for Latent Movement), I was able to take an image that had little to no scatter which was impossible before."

Dr Lionel Friedmann DipChD, The Dental Chambers Kensington.

To learn more about CALM, why not arrange a demonstration at your practice in our mobile dental showroom; PlanDemo. Simply visit www.plandemo.co.uk or call us free-phone on 0800 5200 330
