Planmeca ProMax® 3D family
True all-in-one units for all your imaging needs

Planmeca ProMax® 3D is a product family consisting of exceptional all-in-one units. With three different types of three-dimensional imaging – as well as panoramic, extraoral bitewing and cephalometric imaging – these intelligent products can meet all your maxillofacial imaging needs.

- **All imaging modalities:**
  - Panoramic
  - Cephalometric
  - CBCT image
  - 3D photo
  - 3D model scan

- **An ideal FOV for every diagnostic need**

- **Comprehensive Planmeca Romexis® software for an efficient workflow**

- **Planmeca Ultra Low Dose™ technology, with child mode offering an even smaller volume and therefore even lower does – the option to significantly increase the resolution right down to 75 microns voxel size for detailed endodontics**

- **Open patient positioning making it easier for the operator and less intimidating for the patient.**
